Q6 - What could I have done as a student to improve my learning in this course?	
Response Rate:	85.71% (6 of 7)
1	Taken more notes.
2	Studied more
3	I definitely could've studied more
4	I could have paid better attention within the class periods rather than going back and rewatching the lectures. I could have also been more interactive within the lessons.
5	I could have studied and really made sure I understood the material a little bit better before the tests.
6	I could have been more diligent with pacing my assignments.

Q7 - What aspects of this course did I find to be particularly valuable?	
Response Rate:	85.71% (6 of 7)
1	I liked that Dr. Serr made it very clear how all that we were learning about directly applied to "the real world" she provided plenty of examples. I think it would've been beneficial if I had created a group me to ask questions and to study with a group in the same class as me.
2	I found the information shared within the class to be valuable. The lessons were very informational.
3	I appreciated the clear and outlined schedule of assignments due ahead of time.
4	Her homework were not too hard and the concepts were mostly easy to grasp.
5	All of the course material was valuable, and I personally found the genetics unit very interesting.
6	Access to help

Q8 - What aspects of this course do I think could be improved and what suggestions would I make to improve them?	
Response Rate:	85.71% (6 of 7)
1	Sometimes it felt like we did breakout room A LOT! And other times they were helpful because people would actually talk in the rooms.
2	Obviously, it would be ideal for this class to be in person but really I can't think of anything that would need to be improved.
3	None I can think of
4	I'm not entirely sure I learned effectively through the fill in notes, but that is just a personal preference.
5	I wish I could have taken this class in person as I would have learned better, but other than that, all of the activities and quizzes helped prepare me for the tests.
6	I think that the course does not need improvement, the way it is was very interesting and captured my attention.
